

# Fedor Lisin

[theo.lisin@gmail.com](mailto:theo.lisin@gmail.com) 374 (93) 717-837

It took me around two years to realise that I liked programming in general and data science in particular. Since taking the Yandex classes, well-written, readable code has become my intention. My current focus is creating products that benefit or facilitate the lives of people, not just reviewers.

## SKILLS

ML AND DATA SCIENCE	sklearn, torch, statistics, linear algebra
PYTHON DEVELOPMENT	FastAPI, Pydantic, ORM, SQLAlchemy, ML frameworks
CI/CD	Docker, Docker Compose, Github Actions, Gitlab Pipelines
C/C++	
COMMON	VSC, Gitlab, Github, Reviewing, Linux

## EXPERIENCE

**Junior Data Scientist** Sep 2021 - Sep 2022

Developed different models from scratch for tabular data and time series, upgraded the current data infrastructure, supervised the students' self-study pet projects.

- Train delay investigation system: improving data infrastructure, time to create the final dataset was at least cut in half. (Catboost, SQL, ClickHouse)
- EEG motor imaginary classification: examining the primary methods for getting, classifying, and filtering EEG data, as well as developing experimental data collection methods. (ICA, SSP, WPD)
- Recommendation system for ticket sales (students project): aided students in using their repository and fixed django framework issues. (Git, Conda, Django)

## EDUCATION

**St. Petersburg Academic University of RAS**

Jan 2016 - Jan 2020  
Bachelor - Theoretical Physics

**MADE Data Academy**

Jan 2022 - Jan 2023  
- Data Science, MLOps

## LANGUAGES

English  
*Intermediate*

Russian  
*Native Speaker*

## INTERESTS

Games

Airplanes

- PPL
