Fedor Lisin

theo.lisin@gmail.com   374 (93) 717-837

It took me around two years to realise that I like programming in general and data science in particular. Since taking the Yandex classes, well-written, readable code has become my intention. My current focus is creating products that benefit or facilitate the lives of people, not just reviewers.

SKILLS

ML AND DATA SCIENCE	sklearn, PyTorch, statistics, linear algebra
PYTHON DEVELOPMENT	FastAPI, Pydantic, ORM, SQLAlchemy, ML frameworks
CI/CD	Docker, Docker Compose, Github Actions, Gitlab Pipelines
C/C++	
COMMON	VSC, Gitlab, Github, Reviewing, Linux

EXPERIENCE

Junior Data Scientist   Sep 2021 - Sep 2022

Developed different models from scratch for tabular data and time series, upgraded the current data infrastructure, supervised the students' self-study pet projects.

- Train delay investigation system: improving data infrastructure, time to create the final dataset was at least cut in half. (Catboost, SQL, ClickHouse)
- EEG motor imaginary classification: examining the primary methods for getting, classifying, and filtering EEG data, as well as developing experimental data collection methods. (ICA, SSP, WPD)
- Recommendation system for ticket sales (students project): aided students in using their repository and fixed django framework issues. (Git, Conda, Django)

EDUCATION

St. Petersburg Academic University of RAS
Jan 2016 - Jan 2020
Bachelor - Theoretical Physics

MADE Data Academy
Jan 2022 - Jan 2023
- Data Science, MLOps

LANGUAGES

English
Intermediate

Russian
Native Speaker

INTERESTS

Games

Airplanes

- PPL
