in theo-lisin (https://www.linkedin.com/in/theo-lisin/)

It took me around two years to realise that I like programming in general and data science in particular. Since taking the Yandex classes, well-written, readable code has become my intention. My current focus is creating products that benefit or facilitate the lives of people, not just reviewers.

SKILLS

ML and Data Science
Intermediate

sklearn | PyTorch | statistics | linear algebra

Python Development
Intermediate

FastAPI | Pydantic | ORM | SQLAlchemy | ML frameworks

CI/CD
Beginner

Docker | Docker Compose | Github Actions | Gitlab Pipelines

C/C++
Beginner

Common

VSC | Gitlab | Github | Reviewing | Linux

WORK EXPERIENCE

2021 - 2022
Junior Data Scientist at OCRV, Russian Railways affiliated company

Developed different models from scratch for tabular data and time series, upgraded the current data infrastructure, supervised the students' self-study pet projects.

- Train delay investigation system: improving data infrastructure, time to create the final dataset was at least cut in half. (Catboost, SQL, ClickHouse)
- EEG motor imaginary classification: examining the primary methods for getting, classifying, and filtering EEG data, as well as developing experimental data collection methods. (ICA, SSP, WPD)
- Recommendation system for ticket sales (students project): aided students in using their repository and fixed django framework issues. (Git, Conda, Django)

PROJECTS

Voice emotion recognition using Wav2Vec
2021 - 2021

☐ https://github.com/TheoLisin/Emotion_Recognition_with_Wav2Vec (https://github.com/TheoLisin/Emotion_Recognition_with_Wav2Vec)

Skills acquired: Wav2Vec | transformers | telegram-api

Speech emotion recognition model based on Wav2Vec with telegam-bot user interface.

- Trained 8-class classifier on RAVDESS dataset using Wav2Vec pre-trained model.
- Developed a Telegram bot to gather more data and test the model on Russian speech.

Monotone Hurwitz numbers in genus zero
2019 - 2020

Skills acquired: mathematical physics | graph theory

University-authored bachelor's thesis

EDUCATION

Bachelor Theoretical Physics at St. Petersburg Academic University of RAS
2016 - 2020

Data Science, MLOps at MADE Data Academy
2022 - 2023

CERTIFICATES

Machine learning | course authored by Stanford University

Coursera, Stanford University

2020-07-25

🔗 https://coursera.org/share/fcf17fea90f4868b828c71c2cad3ff7c
(https://coursera.org/share/fcf17fea90f4868b828c71c2cad3ff7c)

Artificial Intelligence Technology | 6-month course

Yandex School of data analysis

2021-08-10

LANGUAGES

English
Intermediate

Russian
Native Speaker

INTERESTS

Games

Airplanes
Skills acquired: PPL

Traveling
